

Enko La Gaiete International School

ISP-2 had a very eventful first month at Enko La Gaieté International School. In spite of being the youngest students in the school, they took on all the challenges with zeal and fought to be included in most things the upper classes were doing. This demonstrated their true spirit of CAS and of the love of learning. *What a beautifully inspiring, intelligent and very active class!*

We were actively involved in learning and not always sitting behind a desk in a classroom.

Here we are collecting plant specimens outside our school to sketch and analyze, as we learned about the importance of plants and the process of photosynthesis, to some life forms on Earth.

Global Perspectives, also known as, Global Citizenship, is a subject which teaches its learners how to become Global Citizens. Subjects like:

- Human Rights
- Citizenship
- Moral Education

These subjects help us to:

- Respect elders in our community.
- Know basic Human Rights.
- Help in active community work.
- Know what is good or bad in the society.

Thank you Mr. Navti

'CAM-ART is a class which helps us to develop creative, fun, expressive and joyful spirits. We are taught CAM-ART by Mr. Tonye. Mr. Tonye is teaching us many things; he even told us that in Arabic or Greek arts is written 'ARS'. We are doing exercise every Fridays and we have 3 period. He gave us an exercise to draw: a garden of flowers, 3 huts, 2 birds in a nest, a leaf and an abstract (something that comes in to your mind). The 5 day of school he told us to make with a paper the thing that we want and he called 5 people and I was in the 5 people to tell them our village and how we say good morning and how we answer in our mother tongue and the other group came and us their dances and their tribunes and also their villages. Mr. Tonye teaches many subjects and he teaches it well.'

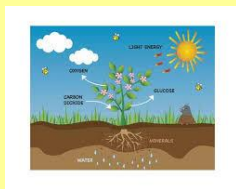

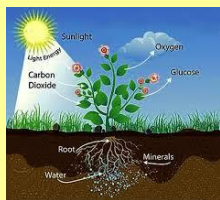

NGUETSOP Paule Angela ISP-2

I am writing about the toilet .I want to tell you that the toilets are always clean and well taken care of ,the toilet on the ground floor is the workers toilet, on the first floor is the boys toilet ,on the second floor is the girls toilet, and on the third floor is the staff toilet .

Written by Julian NKUME, ISP-2

Intergrated science is the study of [chemistry, biology, physics and parts of maths.] Biology is the study of living organisms. But the topic I will want to talk about is photosynthesis.

Photosynthesis is process where plants make their food. The ingredients are [co. water and sunlight] while the products are [glucose and oxygen]. The glucose that remains in the plants is stored as starch. The oxygen that the plants remove the humans use the oxygen to breath and we live on oxygen. Some photos are down;

Math is a science subject that many people don't like, but is about numbers and formulas. If you practice the formulas very well and do exercises you will like it. The name of my math teacher Mr. Divine and he is a good math teacher.

By ENOW JASON, ISP-2

The Cambridge Learner's profile challenged us in ways we never thought possible and we will continue to grow and be stretched until we have internalized to the point that they become as much a part of us as our limbs.

We learn in different ways, either as a class or as a group!
