

Boomerang

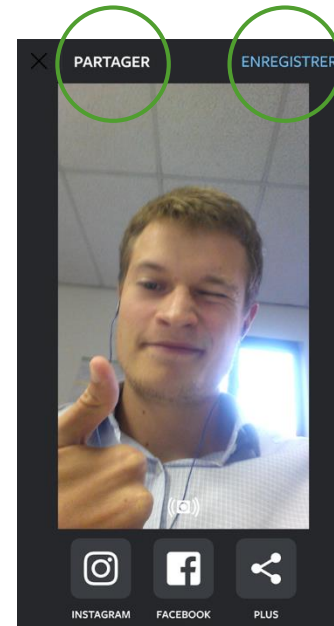

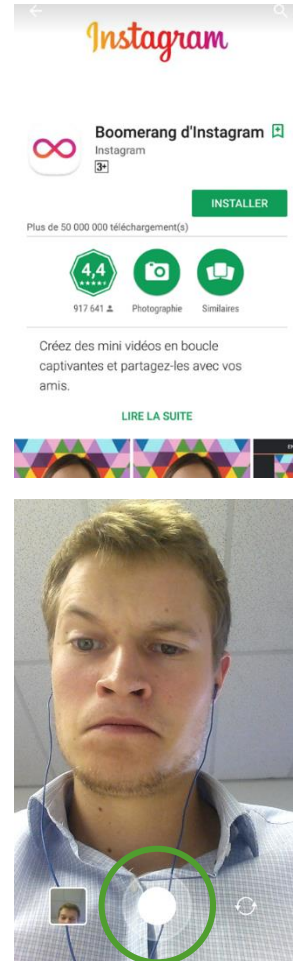

-

How to ?

Boomerang is an Instagram app that allows to shoot a video and then put it backwards

1. On the playstore, look for *Boomerang*
2. Download it, no need to be on Instagram
3. Try it, play with it, record videos on the app ! The video starts recording when you press the central button, it stops when you release it.

4. Check if the result suits you
5. You can then **store it** and then share it. **It will be stored as a video**, so you can send it and then post it on Facebook via a computer.
6. Post it on Facebook !

● A few tips for a nice Boomerang

Move

Your Boomerang video should finish at a completely different point than where you started, for the most dramatic effect. Let off the app's shutter button right at the height of the action.
